Arcshield Welding Helmet AZ400

The welding helmet offers protection against extremely bright lights and ensures protection for anyone involved in welding. It is well ventilated to allow for longer lasting comfort.

www.saharaworkwear.com

LENS APPLICATION CHART

 Clear: Provides excellent optics for general applications where impact protection is required. Nominal 85% VLT.	 Dark Brown: Outdoor protection from glare and reflection. This product is a code 2 shade 3 filter approved to AS/NZS 1338.2. Code 2 filters may effect colour perception for some wearers.	 Blue and Silver Mirror: For outdoor use where sunlight and glare cause eye strain and fatigue. 'Mirror' coating reflects light, reducing the amount of light that passes through the lens. Nominal 9% VLT.
 Grey: For outdoor use where light and glare can cause eye strain and fatigue. Nominal 12% VLT.	 Light Brown: Outdoor applications where sunlight and glare cause eye strain and fatigue. Meets colour traffic signal recognition requirements. Nominal 24% VLT.	 Vermillion: Enhances contrast while reducing all colours equally for optimum colour recognition. Ideal for indoor inspection. 55% VLT
 Light Mirror Tint: For optional indoor/outdoor applications. Serves the same purpose as grey lens yet allows more visible light through the lens. Reduces glare from artificial light such as halogen and fluorescent. Nominal 39% VLT.	 Light Blue: Serves the same purpose as the grey lens, yet allows more visible light through the lens for optional indoor/outdoor applications. Reduces glare from artificial light such as halogen and fluorescent. Nominal 47% VLT.	 Filter Shades: Protects against ultra-violet and infrared radiation
 Amber: Blocks the blue portion of the visible light spectrum, creating maximum contrast enhancement, particularly in low light. Nominal 85% VLT.		Shade 3.0 generated when working with molten metal, and in welding, cutting, soldering and brazing. Please consult your eyewear provider for further information. Shade 5.0
